EXPERIENCE

Software Developer (Backend) — **July 2025 – Present**
RiskGrid AI — ***Remote (Bangalore, India)***

- Built a ReBAC (Relationship-Based Access Control) engine using Python, FastAPI and PostgreSQL with Firebase authentication, enabling fine-grained, relationship-aware role and permission management across the platform
- Developed backend services for Project Hub in Python and FastAPI, and implemented audit logging to record user and system actions for traceability and accountability
- Set up CI/CD pipelines with GitHub Actions for 15+ services, automating build, test, Docker containerization and deployment to GCP Cloud Run
- Provisioned multi-region GCP environments for development, staging and production using Terraform, with Cloud Run deployments driven by GitHub Actions and keyless authentication via Workload Identity Federation (WIF)

Software Developer Intern — **July 2025 – Aug. 2025**
Indian Oil Corporation Limited (IOCL) — ***Digboi, Assam***

- Developed a cybersecurity web app integrating Google Gemini 1.5 Flash to identify phishing URLs and malicious files, enabling 30% faster threat detection
- Designed and implemented 6 RESTful API endpoints, reducing data processing time by 50%; troubleshot full-stack issues and documented system workflows

Web Developer Intern — **Jan. 2025 – Apr. 2025**
GrowthLink Solutions — ***Remote***

- Migrated company portfolio from WordPress to React.js, improving page load speed by 60% and delivering the project 1 week ahead of schedule
- Implemented a 4-layered architecture (UI, Hooks, State, API), reducing senior engineer code review time by 15%

PROJECTS
